TITLE : PIPE JOINT

ABSTRACT : PURPOSE: To decrease a size in a rear side sleeve to form a pipe joint into compactness, and further to prevent decreasing corrosion resistance.

CONSTITUTION: Heat treatment for hardening is applied to a surface of an annular protrusive part 12 in the front end of a rear side sleeve 4, and plating 13 for preventing corrosion is applied to a total surface of the rear side sleeve 4. Electrode potential of a material of the plating 13 is set to within $\leq 2.5V$ relating to electrode potential of a material of a pipe 2.
